SUBJECT: Conducted unannounced, scheduled inspection.		
RESOLVED COMPLAINTS:		

Marquette Green Energy was issued Permit to Install No. 55-14 on October 10, 2014, for a 560 MMBTU per hour steam/electric generation facility, located at 413 First Street, in Gwin, Marquette County.

On February 9, 2016, Mr. Stewart Harrison, requested an extension of the permit, which the AQD reviewed and provided an 18 month extension to begin construction of the facility. The deadline for commencing construction is now no later than October 9, 2017.

On March 6, 2017, I conducted an inspection of the facility to determine what progress, if any, had been made to date. I met with Mr. Harrison, who informed me construction had not begun, but he was hopeful the project would get started. In the meantime, the company is looking at several other options of bringing power stability to the Upper Peninsula.

At this time there are no compliance issues to report. A follow-up visit in late October should be conducted to determine if PTI 55-14 should be voided.
