plant

April,

In answer regarding Permit # 173-10 I have submitted an application for a Modification to Existing Permit - Permit # 173-10.

Due to weather related conditions, we are not operating this plant at the present time. As soon as we under full production I will schedule the Visible Emissions Testing. This should be possible well within the time limits specified. I will keep you updated of this activity.

Thank you for your help in this mater.

Donna,

As discussed today, Diversco needs to update the General Permit No. 173-10 to reflect current equipment. A Violation Notice will be issued, addressed to Dan Timmer.

Attached are the forms you need for the permit modification and relocation notice submittal.

Visible emissions testing of the equipment per the permit states that it must be done within 60 days of achieving maximum production rate, but not later than 180 days after initial startup. This link has a list of Environmental firms that conduct the testing: http://www.michigan.gov/deq/0,4561,7-135-3310_4148-47589--,00.html
