October 26, 2018

Mr. Joe Scanlan  
Upper Peninsula District Office  
Michigan Department of Environmental Quality  
1504 W. Washington Street  
Marquette, Michigan 49858-3196

Mr. Joe Scanlan,

The week of September 5th it was discovered Casting Services Group was in violation of (PTI) number 51-12A under special condition VI. Casting Services Group was unable to produce emission records for unit ID EUCSG1. After examining the EUCSG1 thermal oxidizer temperature data logger, it was found that the batteries were dead. The duration of the violation was approximately 12 months. The violation is now noncurrent. The batteries were replaced on 9/25/18 and a 15-minute sample interval is being utilized. A data logger check has been added to the EUCSG1 startup instructions and its operational status will be reviewed each time the furnace is started up.

Best regards,

Matt Bourion  
Casting Services Group  
715-923-4830
