Dear Mr. Forth,

Per your letter we have implemented WOT test time to our data that we supplied to you. Considering that you are new to Sterling Performance we realize that the information you wish to see from us may differ from what the previous inspector had required. Please review the revised information and let us know if we are meeting your requirements. If not, please advise. If there is information that you feel we no longer need to present, please let us know and we will eliminate that information.

We would like to invite you out to view a typical dyno test for us and with that visual you can advise us on any improvements you would deem necessary for our new relationship.

Best Regards,

Michael D'Anniballe
Sterling Performance Inc.
