Dear Mr. Forth,

On June 10th we received a violation for PTI No 43-13B Special conditions 11.3,11.2, VI.2C, VI.4. We have been keeping hourly time records regarding to the permit. We will include this list with this letter. In the past Iranna Konanahalli, was not concerned with these individual numbers. Moving forward we will add to the list fuel usage for the hourly run time. We dispute that we have exceeded the material limits for the permit in any way shape or form. We would like you to provide information on how you determined that we did exceed those limits. Based on the hours run it is mathematically impossible to exceed the limits.

In the past we have invited you to come out and watch us run the dyno. We encourage you to do so, so you can see that we are well in compliance with the permit. We would also appreciate when we ask you if you have any question or concerns to let us know at that time so we can address them face to face rather than waiting to receive letters of non-compliance.

Best Regards,

Michael D'Anniballe
