ACTIVITY REPORT: Self Initiated Inspection

P051925491

FACILITY: ACCU-TECH MANUFACTURING		SRN / ID: P0519
LOCATION: 51210 ORO ROAD, SHELBY TWP		DISTRICT: Southeast Michigan
CITY: SHELBY TWP		COUNTY: MACOMB
CONTACT: LOUIS RAHHAL , PRESIDENT		ACTIVITY DATE: 06/10/2014
STAFF: Rem Pinga	COMPLIANCE STATUS: Compliance	SOURCE CLASS: Minor
SUBJECT: Unannounced Level 2 Self-initiated Inspection		
RESOLVED COMPLAINTS:		

On 06/10/2014, I conducted a level 2 self-initiated inspection at Accu-Tech Manufacturing, Inc. located at 51210 Oro Drive, Shelby Township, Michigan 48315. The purpose of the inspection was to determine the facility's compliance with the requirements of the Federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451), and the Administrative Rules. As part of the inspection process, I initially showed my credential (ID Badge), stated the purpose of my visit, and gave a copy of the pamphlet "Environmental Inspections: Rights and Responsibilities" to Mr. Louis Rahhal, company President and facility contact person. Mr. Rahhal contacted the AQD Warren office and requested for AQD staff to conduct an assessment of the facility processes for any potential permitting requirements. The facility manufactures parts for automotive tooling to be used in the Tool and Die Industry. At the plant, I learned that the company operates in 2 separate building addresses within the same street and industrial site: 51559 Oro Drive facility and the 51210 Oro Drive facility. After conducting inspection at the 51559 Oro Drive facility, Mr. Rahhal and I proceeded to the 51210 Oro Drive facility.

During the walk through inspection, I was accompanied by only Mr. Rahhal at the 51210 Oro Drive facility. Per Mr. Rahhal, the 51210 Oro Drive facility conducts mostly machining processes. I observed 5 CNC machines and 3 boring mills at this site exempt from permit to install requirements per AQD Rule 285(vi). Emissions from the machining equipment were released in the general in-plant environment and I did not observe any ductwork system that release air emissions to outside air.

Mr. Rahhal also informed me of another company, York Machining Company (YMC) sub-leasing a section of the building. I observed 4 smaller CNC machines. The company does machining activities on smaller scale and exhaust emissions in-plant.

Overall, I did not find any non-compliance issues during the inspection.
