

Owen Pierce  
Environmental Engineer  
EGLE, AQD Warren District  
27700 Donald Court  
Warren, MI 48092

Mr. Pierce,

This is in response to the notice of violation received at our Mold-Masters Injectioneerring location at 29111 Stephenson Highway, Madison Heights, Michigan 48071 from the inspection that occurred on June 8, 2023.

We conducted an investigation into why the facility had not met the permit conditions noted below. The facility was unaware of the continuing requirements for the permit after it was issued. We have remedied that issue and have corrected each violation below as follows:

With regards to the PTI No. 99-15B, Special Conditions VI.1, VI.3 and VI.7, during the inspection, the facility had failed to provide the time, date, duration, sand bed temperatures, and exhaust air flow temperatures for each batch of materials processed on a calendar day basis for the requested time period of January 2022 to May 2023. To correct the violation, our PLC is now programmed to both collect and save this information. We are considering this action closed at this time.

With regards to the PTI No. 99-15B, Special Conditions VI.5, during the inspection, the facility failed to keep records of all visible emissions readings in a satisfactory manner for the requested time period of January 2022 to May 2023. To correct the violation, we immediately began monthly visible emissions readings in June and are sending the reports to your office. We are considering this closed at this time.

With regards to PTI No. 99-15B, Special Conditions VI.1, and VI.3-4, during the inspection, the facility failed to provide temperature data records for the afterburner chamber and a record of the hours of operation of the emission unit on a monthly basis and on a 12 month rolling time period as determined at the end of each month for the requested time period of January 2022 to May 2023. To correct the violation, we contacted the manufacturer. All of the data is currently stored on the machine. Their IT department is currently working with the MoldMasters' IT department to be able to retrieve the information and have the program calculate the emissions to meet the permit requirements. This is due to be complete by November, 15, 2023.

If you have any questions regarding the resolutions, please let us know.

Sincerely,

A handwritten signature in black ink, appearing to read "Owen Pierce", written over the word "Sincerely,".
