Subject: FW: FW: Information Regarding Visible Emission Evaluation

Hi Andrea,

I know you are on vacation this week. When you get a chance, could you please print this email as documentation for the VN response for Cliff A Messing Exc. P0679. I currently have the hard copy file, but I plan to return it the next time I am at the office. I will be sure to let you once I do. Thanks for your help and enjoy your vacation!

Hi Cliff,

Thank you for providing this update. I look forward to hearing back from you once you have it all in order. I will be sure to reach out if I have any questions. As always, if you have any questions for me, feel free to contact me either by phone or email.

Thanks!

CAUTION: This is an External email. Please send suspicious emails to abuse@michigan.gov

Good Morning Nathanael

We are contracting with Alliance Consultants from Lapeer, MI to do our dust analysis testing and we sent them the copy of the permit and are waiting for a proposal back from them. I will contact you as soon as I have it all in order. I will keep you informed.

Any Questions Please call me.

Hi Cliff,

Below is the email I sent you on June 16, 2021 regarding information on EGLE and crushers. The email also contains links to information on companies that can complete the visible emissions testing, as well as information for Michigan smoke school if you would like to get certified to complete the testing.

Thanks.

Subject: Information Regarding Visible Emission Evaluation

Hi Cliff,

I wanted to reach out and provide the information we discussed yesterday regarding the visible emission evaluation. EGLE information and forms for crushing facilities can be found on the [EGLE Nonmetallic Mineral Crushing Facilities Guidance](#) webpage. On the webpage is a link to the document, [Michigan Environmental Compliance Guide for Nonmetallic Mineral Crushing Facilities](#). This document is very helpful at understanding all the EGLE AQD requirements for crushers. Information regarding the performance testing that is required to evaluate visible emissions is discussed in the document beginning on page 1-9.

In addition, here is the EGLE list of [environmental consultants offering air services in Michigan](#). We are not able to recommend any companies, but the list provides many options of consulting companies you can reach out to. You can also check out [EGLE's webpage for environmental consultant assistance](#). The webpage provides information that can be helpful when choosing a consultant.

Lastly if you would like to become Method 9 certified, that can be done by completing [Michigan smoke school](#). The visible emission assessment can be completed by individuals who are method 9 certified and complete the evaluation in accordance with the federal Standards of Performance for New Stationary Sources 40 CFR Part 60 Subparts A and OOO.

If you have any trouble with the links I provided, let me know and I can resend them. If you have any questions, feel free to reach out to me at the number or email listed below. Thanks.
