Mr. Kovalchick,

We are working to address all the issues from the November 20th 2017 inspection you preformed. Below I have listed each violation and how we are correcting the issues to be in compliance.

Rule 310- Open Burning- We will no longer perform any open burning on site other then natural wood fires.

PTI 130-16- Our crusher is now equip with water spray to control dust.

SC 1.9 – No Dailey Records kept of material produced. We now will be login what material is being crushed and quantities to comply.

SC 1.10 & SC 1,11 - We will notify the AQD within 15 days of start up, we are in the process of updating our permit/ application to show newly acquired equipment.

SC1.12 We will be updating our process information and identify new equipment as we purchase in the future. We will keep records of dates of replacement and modification. We also will notify AQD when new equipment is added within 15 days of purchase.

Our visible emissons test will be done within 3 weeks. We are waiting on the testing company to schedule a date with our quarry. We are equipping spray bars on our aggregate screen now, and adding water pumps to control dust when needed. It will take about 1 more week to complete the install of water to all equipment on site.

Let me know if you have any further questions,

Hard Rock Quarry LLC
