Subject: Violation Correction, SRN: P1020, Macomb County

To Shamim Ahammod:

On September 13, 2023, I received a violation notice for not installing and maintaining a belt scale on my 1x3 crushed concrete transfer conveyors of FGCRUSHING. The violation occurred on July 26, 2023. The cause of the violation was failure to install and maintain a belt scale on both product conveyors. We currently have a belt scale on the 21ACC conveyor which produces twice as much product as the 1x3cc. We have been using the 21acc belt scale amount and multiplying it by 1.5 to get a daily total of all material produced. We do log a rough total of both materials produced daily. The duration of the violation has been ongoing until we install a second belt scale. I was working with a supplier that was supposed to have a scale by now, but has not. As of last week, I reached out to another supplier and am in the process of ordering from them. At this point, I am waiting for a quote for a belt scale for our application. Once the quote is received and approved, we will get it ordered and installed. No re-occurrence will happen once this is installed. Should you have any further questions, please contact me. Thank you for your patience and understanding.
