September 9, 2019

Dear Jon,

This letter is in response to our violation notice dated August 21, 2019. We were unaware we were in a non-compliance situation, due to a special condition in our permit 242-10A. The stack configuration has been in place since our original permit, which was issued in 2011. While reviewing our new permit, there was an oversight on this provision requested.

We have just applied for a PTI modification for the existing stack configuration to be acceptable. If there are any other steps that we can take that will facilitate this process, please feel free to contact me and we can discuss the situation further.

Warm regards,

Steve Carlson
