Date of Investigation: July 2, 2019
 Date of Report: July 10, 2019
 Source: Power Storage Solutions
 SRN: P1043
 Address: 12333 Belden Court, Livonia, Michigan
 Facility Staff Present: Will Hamilton, Employee
 DEQ-AQD Staff Present: Todd Zynda, Air Quality Division, Detroit District Office
 Time of Investigation: 2:35 PM to 2:45 PM

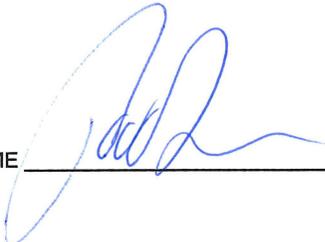

Summary of Facility Visit and Compliance Status:

Power Storage Solutions, located at 12333 Belden Court, Livonia, Michigan, was identified as a targeted inspection for 2019 due to the close proximity to ambient air trichloroethylene (TCE) concentrations that were detected as part of the Ford Beacon Project indoor air monitoring at addresses along Belden Court. For information regarding the ambient air sampling conducted as part of the Ford Livonia Transmission Plant remedial investigation, please see SRN A8645, MACES report CA_A864547612. There are no records of air quality permits on file for this facility.

On July 2, 2019 Mr. Todd Zynda arrived at 2:35 PM at 12555 Belden Court and was greeted by Mr. Will Hamilton. According to Mr. Hamilton, operations at the location are warehousing for servicing equipment for batteries for the telecommunication industry. During the inspection the building was observed with office space on the east side of the building with a warehouse attached on the west side of the building. The warehousing area was observed with storage racks with various electrical repair equipment and parts.

According to Mr. Hamilton, the facility does not operate any of the following equipment: boilers, cold cleaners, or emergency generators.

Operations at the facility do not appear to be subject to air quality rules or regulations. The source is considered to be in compliance for the reason that no air emissions activity occurs at this address.
