STAFF: Todd Zynda	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: July 31, 2019 Inspection		
RESOLVED COMPLAINTS:		

Date of Investigation: July 31, 2019

Date of Report: August 8, 2019

Source: Kone

SRN: P1061

Address: 11864 Belden Court, Livonia, Michigan

Facility Staff: Zakia Hadley, Admin Associate

EGLE-AQD Staff Present: Todd Zynda and Rebecca Loftus, Air Quality Division, Detroit District Office

Time of Investigation: 1:35 PM to 1:41 PM

Summary of Facility Visit and Compliance Status:

Kone, located at 11864 Belden Court, Livonia, Michigan, was identified as a targeted inspection for 2019 due to the close proximity to ambient air trichloroethylene (TCE) concentrations that were detected as part of the Ford Beacon Project indoor air monitoring at addresses along Belden Court. For information regarding the ambient air sampling conducted as part of the Ford Livonia Transmission Plant remedial investigation, please see SRN A8645, MACES report CA_A864547612. There are no records of air quality permits on file for this facility.

On July 31, 2019 Mr. Todd Zynda and Ms. Rebecca Loftus arrived at 1:35 PM at 11864 Belden Court and were greeted by Ms. Zakia Hadley, Admin Associate. According to Ms. Hadley, operations at the location are office space and warehousing of elevator repair materials/equipment. The warehousing area was observed with storage racks with various elevator repair equipment and parts. The warehouse also contained approximately twelve 55-gallon drums of hydraulic oil (exempt per R 336.1284(2)(c)).

According to Ms. Hadley, the facility does not operate any of the following equipment: boilers, cold cleaners, or emergency generators.

The storage of hydraulic oil at the facility appears to be PTI exempt. The remaining operations at the facility do not appear to be subject to air quality rules or regulations. The source is considered to be in compliance.
