August 23, 2022

Dear Department of Environment, Great Lakes and Energy,

Following the inspection on August 11, 2022, I have started to make a logbook to keep track of what and how much is put into my crematory. Also, I will not exceed the 300-pound limit of the machine. My logbook will also track burn time in the second chamber.

Sincerely,

A handwritten signature in cursive script that reads "Dr. Daren A. Krause".
