Subject: Contour Development Group

Hi Bob,

I just wanted to follow up to your violation notice and responses to Contour regarding the permitted crushing operations at Northland Mall. The minimum drop distance has been reduced and boards have been installed to help capture the material being transferred from the crushing conveyor (see the attached photos).

The daily logs are still being utilized and provided as an attachment to this email. A belt scale has been ordered, but not yet installed.

After reviewing the correspondence between Contour and yourself, I believe the cited issues have been addressed from the initial violation notice dated May 16, 2022. If there are any outstanding compliance concerns that have not been addressed, please feel free to contact me at your earliest convenience.

Thank you

Jacob Abair | Chemical Engineer | 248.324.2148 | Fishbeck.com
