Dear Lyle Fleischmann:

VIOLATION NOTICE

On August 17, 2022, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Meg's Hauling located at 67401 Brian Drive, Ray Township, Michigan. The purpose of this inspection was to determine Meg's Hauling's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; the conditions of Permit to Install (PTI) number 100-22; and to investigate a recent complaint which we received on August 5, 2022, regarding fugitive dust attributed to Meg's Hauling's operations.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
FGCRUSHING	PTI No. 100-22 Special Condition 1.9	Meg's Hauling did not record or maintain records of material throughput in FGCRUSHING.

This process is also subject to the federal New Source Performance Standards (NSPS) for Nonmetallic mineral processing plants. These standards are found in Title 40 of the Code of Federal Regulations (CFR) Part 60, Subpart OOO.

During this inspection, Meg's Hauling was unable to produce records of material throughput in FGCRUSHING. This is a violation of (the recordkeeping and emission limitations) specified in Special Condition 1.9 of PTI number 100-22.

The conditions of PTI number 100-22 require Meg's Hauling to record and maintain records of all material processed in FGCRUSHING. This includes material processed through all existing and future equipment located at this site.

Please initiate actions necessary to correct the cited violations and submit a written response to this Violation Notice by September 21, 2022 (which coincides with 21
