On April 17, 2024, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Stanek Rack Company located at 4786 Bellevue Street, Detroit, Michigan. The purpose of this inspection was to determine Stanek Rack Company's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); and the Michigan Air Pollution Control Rules.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Burn off oven for baking off plastisol when repairing used racks.	Rule 201	The facility constructed and operated the burn off oven without a Permit to Install.

During this inspection, it was noted that Stanek Rack Company had installed and commenced operation of unpermitted equipment at this facility. The AQD staff advised Stanek Rack Company on April 17, 2024, that this is a violation of Rule 201 of the administrative rules promulgated under Act 451.

A program for compliance may include a completed PTI application for the burn off oven process equipment. An application form is available by request, or at the following website: [www.michigan.gov/air](http://www.michigan.gov/air).

Be advised that Rule 201 requires that a permit be obtained prior to installation, construction, operation, reconstruction, relocation, or alteration of any process or process equipment which may be a source of an air contaminant.
