

Enforcement Officer ,

Complaint Number: C-18-01942

On July 17 ,2018 we received a violation notice under Rule 201 for sandblasting operation. We were advised and notified 2 weeks later that we needed to submit a written statement as to what repairs we would be making. We are currently working on correcting and reconstructing our sandblast area to meet code and standards. We are adding a front and back wall to enclose this area. All blasting has stopped until these repairs are made. Diposal of the sand will be made at the correct falicities. Attached is a drawing of the measures we are taking to adjust this issue. If you need any additional information please feel free to contact me via email, phone or in person.

Sincerely,  
Keri Jacobs

Office Manager @ M & C Repair/Trucking
