Re: SRN: U172100125

Dear Mr. Scanlon:

I am in receipt of the violation notice referenced above dated January 14, 2021 and am responding to the requested actions to correct the cited violations.

Land's End Management purchased the subject property from the owner of River Bend Resort in early November 2020 but Land's End Management never operated the building commercially. The demolition of the subject building took place from late December 2020 into early January 2021 in connection with preparation for a residential building site by Fountain Trucking. We filed and received a demolition permit from the Village of DeTour in early December 2020 but were unaware that we needed to provide the notification and survey for asbestos containing material. We were relying on Fountain Trucking's knowledge of any other requirements.

Since the demolition of the building was completed earlier this month, there is no further demolition that will take place. This is a one-time project for Land's End Management and I do not anticipate any similar circumstances or projects in the future that would create a reoccurrence. However, now that I'm aware of the requirements, I will comply to the extent that I ever undertake demolition of a commercial structure in the future. I apologize for being unaware of the requirements.

Respectfully submitted,

Land's End Management, LLC

David Lee Gray, Managing member
