Attention: Julie L. Brunner, P.E.

Senior Environmental Engineer, Air Quality Division 517-275-0415

SRN: U191612206, Clinton County

The dust collection that BNM installed is a Model No DCB-7-CO. I am enclosing the information on the machinery. The filter section of the power module removes the dust and clean air is exhausted back into the room, up to 99.8% efficiency at 0.5 micron particle size. The information on the dust collection modules is 8,960 SCFM per module, since BNM has 2 modules the total airflow is 17,920 and the filters are MERV 13. Dust collection has been installed. Dust is collected in collection bins in bottom of collection machine and properly disposed of.

We have installed door sweeps around the big doors in the sandblasting room.

All the upgrades are complete and in operation as of Monday 11-5-2018. BNM has cleaned up the piles of dust and particulate that had accumulated in the plant. If you need pictures of the new collection equipment I can send them, also pictures of the cleaned up area.

We have two employees that are assigned the responsibility to keep the log on all the maintenance

Break downs and fixing for the sandblasting collection unit. They are Mike Jones and Dan Russell.

In regards to the paint operation room. Chris Andrews has been our main painter since 2001. He has worked with Painters Supply consultants. Pat Tabit is our territory mgr/and tech rep. Phone 810-516-3824. ptabit@painterssupply.com Our filters for the paint room come from Chem Quest our rep is Dale Mulder Cell# 269-804-9390, main phone 269-795-9877. I am enclosing the information on the red media synthetic filter media that we use for the paint room. The tech reps have worked with Chris our painter on the maintenance and up keeping on the paint room equipment. The exhaust filters in the paint room are changed every other time the paint room is used.

BNM also was turned in to Clinton County by our business neighbor Casey. Joel Haviland building and zoning administrator made a visit and we were cleared of anything that Casey was complaining about.

Joel found nothing to wright us up on and said this was an industrial area and we are in compliance with the building and zoning administration.

I am sending the information that he left us. I hope this information is satisfactory. If you need anything else let me know.

It would be nice to get this situation taken care of correctly and I assure you that BNM is trying their best.

Thank you,

Sandra Jones
