Inspection Summary

This was a self-initiated inspection due to a large white compressed gas cylinder on the property I had noticed when in the area the previous month.

I arrived around 1340 and went to the front office. I asked for a manager or the owner and introduced myself. Susan came to the front and I introduced myself. I stated that I was there due to the large white compressed gas cylinder which I thought was a anhydrous ammonia tank. Susan stated that they had a large propane tank, but did not have anhydrous ammonia on their site. She walked me back and we confirmed it was a propane tank. She stated it is used to heat the buildings where they conduct minor maintenance on their trucking fleet. Major maintenance was commonly completed offsite. I provided her my business card and asked her to call if she had any concerns regarding air quality.

I left the site around 1410 after finding no concerns.
