FACILITY: Impact Operations LLC		SRN / ID: U341608226
LOCATION: 8808 Grand River Ave, Saranac		DISTRICT: Grand Rapids
CITY: Saranac		COUNTY: IONIA
CONTACT: Andy Graham ,		ACTIVITY DATE: 06/27/2016
STAFF: Eric Grinstern	COMPLIANCE STATUS: Compliance	SOURCE CLASS:
SUBJECT: Unannounced Inspection		
RESOLVED COMPLAINTS:		

Inspection of Impact Operations LLC

FACILITY DESCRIPTION

At the facility staff (Eric Grinstern & Chris Robinson) met with Andy Graham and Angie Sterzick.

The facility started operations at the current location in 2009. The facility is a metal finishing operation that works primarily with steel, zinc and aluminum. The finishing operations consist of polishing, buffing, sanding, grinding, etc. The facility does not have any plating operations. A majority of the parts finished at the facility are subsequently chrome plated at other facilities not owned by Impact Operations.

The facility's operations are conducted in two separate buildings. Within each building are automated and manual finishing processes. Each finishing process is ducted to a particulate filtration system the vents to the in-plant atmosphere. Additionally, the facility has filter towers in each building that filter the in-plant air and exhaust internally. Overall the facility is exceptionally clean and displayed excellent housekeeping practices.

REGULATORY ANALYSIS / COMPLIANCE EVALUATION

All of the facility's processes are exempt from the requirement to obtain a permit to install via Rule 285(I)(vi)(B). Rule 285(I)(vi)(B) exempts the finishing operations from the requirement to obtain a permit to install since they are vented to the general in-plant environment.

Based on the information and observations made during the inspection, the facility appears to be in compliance with all applicable air quality rules and regulations.
