

DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
ACTIVITY REPORT: Self Initiated Inspection

U41150198629104

FACILITY: Select Technologies		SRN / ID: U411501986
LOCATION: 8093 Graphic Drive, Belmont		DISTRICT: Grand Rapids
CITY: Belmont		COUNTY: KENT
CONTACT: Eric Staley, General Manager		ACTIVITY DATE: 04/02/2015
STAFF: Denise Plafcan	COMPLIANCE STATUS: Compliance	SOURCE CLASS:
SUBJECT: This inspection was conducted in an attempt to identify the source of an odor complaint. Following the inspection, AQ staff determined it was not the source of the complaint.		
RESOLVED COMPLAINTS:		

Denise Plafcan (DP) conducted an unannounced unscheduled inspection to determine compliance with state and federal Air Quality rules and regulations and as part of a on-going complaint investigation. DP drove around the area to evaluate possible sources that may be causing a burning metal odor at the complainant's residence. There were no odors and no apparent malfunctions at the facility. DP met with, Eric Staley, General Manager, after a brief introduction and discussion DP explained the purpose of the inspection, the need for the inspection to be unannounced, the recent complaint and reviewed the Environmental Inspection brochure. Eric was also the escort on the inspection.

There are two buildings that are part of Select Technologies, they have 20 employees working one shift from 6am to 6pm five days a week and have been in this location for 15 years. The front or main building (nearest the road) is the office area and where large (over 5 feet by 4 feet) switch or electrical boxes are assembled with the interior or wiring parts. The second building in the back or the west end of the property near the highway exit ramp is used for storage and a large food conveyor oven manufactured in Belgium. The oven is occasionally used by prospective purchasers of the oven to test how the oven roasts food products like chicken breasts or beef. The oven runs on natural gas and does have a stack but the smells would be similar to a restaurant and not that of burning metal.

Eric did say that he has not noticed any odors in the area even though they are located just north of Steel Craft and the stack for the Steel Craft stress relieving oven.

Based on the physical inspection the facility appears not to have any AQ regulated operations, to be in compliance with state and federal Air Quality rules and regulations and does not appear to be the source of the odor complaint.
