RE: SRN U411805361

August 15, 2018

To Whom It May Concern:

I am writing in response to the Violation Notice attached to this document, dated August 2, 2018, for spraying coatings in violation of Rule 201 of Act 451 based on the July 28, 2018 inspection by the DEQ.

As corrective action, Jeff Groesser, of Consolidated Electric Contractors, visited my shop on August 4, 2018 to obtain measurements and to submit a quote for updating electric service to the paint booth for proper ventilation. I am currently waiting on his proposal to take further action. R & R Mechanical will be attaching the stack once Consolidated Electric has completed their work. I expect to have the electrical updates, stack attachment, and proper function of the paint booth completed as soon as possible but no later than January 1, 2019.

In addition, I will utilize the Rule 287(2)(C) exemption, which requires coating usage less than 200 gallons per month and I will document my usage. I typically spray no more than 10 gallons of lacquer per month. I have never exceeded that amount before as I am a small business operation. I will utilize Form 3562 to document my usage and I will keep those records on site for review.

Thank you for your consideration.
