

03/20/2023

This letter is to Jenine Camilleri and the Enforcement Unit Supervisor at EGLE. In regards to SRN: U462206118, Lenawee County. On March 8, 2023 Daejin Advanced Materials 100 Industrial ct. Adrian, MI 49221 was in violation of rule 901(b) of the administrative rules promulgated under act 451. We believe that the violation was caused during a start up process after machinery was shut down for a period of time. After speaking with Stephanie Weems on Wednesday March 8, 2023 I called Adrian Mechanical services to see how they assist Daejin Advanced Materials with this violation. Richard Beach r.beach@adrianmechanical.com (517)263-5025 Adrian Mechanicals project supervisor came to evaluate the situation considering that Adrian Mechanical installed our ventilation system. Richard had returned on Monday March 13, 2023 with Rich Bradish from Environment Air Technology that specializes in air scrubber systems to help design a system to dramatically decrease any odors we are causing that interfere with the residential areas around Daejin Advanced Materials. We are currently waiting on the design and quote from Environment Air Technology to start getting a schedule in place to install the equipment needed to decrease the odors we are exhausting out of the facility.

Thank you

Jesse Beatty

Maintenance Supervisor of Daejin Advanced Materials
