COMPANY PHONE NUMBER: 586-754-2917

On July 24, 2015, AQD staff, Erik Gurshaw, conducted an unannounced, self-initiated inspection at Genex Window, Inc. located at 23110 Sherwood Ave. in Warren, Michigan. The purpose of the inspection was to determine compliance with the Federal Clean Air Act; Article II, Part 55, Air Pollution Control of Natural Resources and Environmental Protection Act, 1994 Public Act 451; and Michigan Department of Environmental Quality, Air Quality Division (MDEQ-AQD) Rules.

Upon arriving at the facility, AQD staff introduced themselves and stated the purpose of the visit to Mr. Geno Hodzic, President. Mr. Hodzic indicated that Genex Window, Inc. employs 14 people and is open Monday through Friday from 8:00 AM until 4:30 PM. Mr. Hodzic assisted AQD staff during the inspection.

Genex Window, Inc. manufactures predominantly vinyl and some aluminum windows and doors. The company receives raw materials (vinyl, aluminum, and glass), cuts the material to customer specifications, fabricates doors and windows from the customized parts, packages the final product, and installs the final product. Equipment at the company includes the following: 12 punch presses; 2 CNC vinyl welding machines; 1 CNC saw machine; 1 CNC glass cutting machine; 1 drill press; and 1 glass washer machine. All of the vinyl, aluminum, and glass cutting equipment vents to the general plant environment and is exempt from Permit to Install requirements pursuant to Rule 285(I)(vi)(B). The glass washer machine uses Windex to clean glass prior to and after it is cut to customer specifications.

Based on this inspection, it was determined that Genex Window, Inc. is a minor source of air emissions and that its process equipment is exempt from PTI requirements.
