Kerry Kelly

Environmental Quality Analyst

Air Quality Division

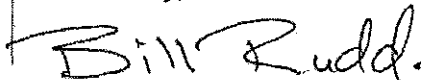

Ms. Kelly,

In response to Violation Notice SRN:U501509175, Macomb County Dated September 2, 2015.

During an inspection that you performed on August 24, 2015 at Fitzgerald Public Schools Chatterton Middle School of the incinerator located in the boiler room you had stated that the permit to run this incinerator was no longer valid. You stated the permit for this incinerator had been voided on May 7, 2001. At the time of this inspection I was unaware of this violation. Immediately following our meeting on August 24, 2015 I personally made sure that power and gas were both turned off and locked out so that the incinerator will no longer be able to function thus making it unusable. I have also posted signs that state that incinerator is no longer to be used for any reason as of August 24, 2015. All of the trash from this building has been either been recycled or placed in the dumpster for removal since August 24, 2015. We will be soliciting quotes to have the incinerator removed from the building. As of this time the incinerator has been locked out and has not been used from August 24, 2015 forward.

Please let me know if you require any additional information.

Sincerely,

Bill Rudd

Supervisor Maintenance, Custodial Operations
