The cause for sawdust blowing on neighbors property. With frozen logs in winter cutting sawdust is a lot finer & depends if wind is from the West it blows around. So I would say it's only in the winter months.

Our north conveyor where sawdust is brought out I ~~would~~ will build a roof & 3 sides to contain the sawdust better as it comes off the conveyor.

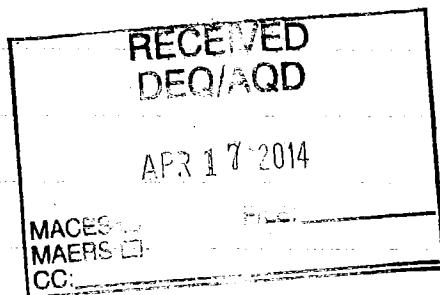

I would want to build this in the next couple months & for sure before winter. The ground needs to settle.

If you have any questions call or stop by.
