

Low.

On the evening of January 28 some deer carcasses were burned in the backyard of my household. The duration of burning was for about 3-4 hours. This violation is not ongoing and will not happen again. I have immediately taken action to clean & dispose of the ashes. I have taken action to have my dumpster emptied more often and if need be to acquire an additional dumpster to remove the carcasses instead of burning.

My employees are also informed that in no case are we allowed to burn any carcasses, but to dispose of them properly.
