

DEPARTMENT OF ENVIRONMENTAL QUALITY
AIR QUALITY DIVISION
ACTIVITY REPORT: Self Initiated Inspection

U70200202854013

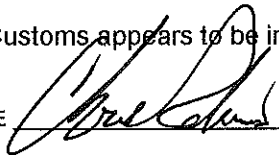

FACILITY: JB Customz		SRN / ID: U702002028
LOCATION: 2414 Chicago Drive, Hudsonville		DISTRICT: Grand Rapids
CITY: Hudsonville		COUNTY: OTTAWA
CONTACT: Jason Burns , Owner		ACTIVITY DATE: 06/18/2020
STAFF: Chris Robinson	COMPLIANCE STATUS: Compliance	SOURCE CLASS:
SUBJECT: FY 20 inspection to determine JB Customz compliance status with respect to applicable air quality rules and regulations.		
RESOLVED COMPLAINTS: C-20-03907		

AQD staff Chris Robinson (CR) conducted an onsite unannounced self-initiated inspection at JG Customz located at 2414 Chicago Drive in Hudsonville Michigan. The purpose of this inspection was to follow up on a complaint/tip received by the AQD on June 16, 2020 indicating that the facility was operating with out the proper permits. CR met with the facility's owner, Jason Burns on June 18, 2020. No spraying was being conducted at the time of this inspection.

Per observations the facility has two (2) spray booths, one of which is a permanent enclosure exhausted outside through dry filters. The second is a spray booth curtain that completely encloses a vehicle only while it is being painted. This booth is also exhausted outside through dry filters. Per Mr. Burns the filters are replaced monthly or as needed. All of which appeared to be in good shape during the inspection.

CR and Mr. Burns discussed air regulations and the requirement to either operate under a Permit to Install or an exemption. This facility is operating under PTI exemption Rule 287(2)(c) for surface coating operations that use no more than 200 gallons per month. The facility uses approximately 8-9 gallons of paint per month, which is well under the limit. Purchase orders are being maintained.

JB Customs appears to be in compliance with applicable air quality Rules and regulations.
