**VIOLATION NOTICE**

On April 17, 2019, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of a home located at 18412 Patton, Detroit. The purpose of this inspection was to determine compliance with the requirements of Title 40 of the Code of Federal Regulations (CFR), Part 61, National Emission Standards for Hazardous Air Pollutants (NESHAP), Subpart M and Rule 942 of the administrative rules promulgated under Part 55, Air Pollution Control of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended.

According to our investigation, Decommissioning Services, LLC performed the renovation activities at the facility.

Vinyl asbestos 9x9 floor tile on basement stairway treads in poor condition and asbestos insulation board on top of the furnace. Samples of each collected by staff were positive for asbestos. Both of these materials were left after the abatement, as well as after the Post-Abatement Verification inspection. During the inspection, staff observed the following air pollution violations:
