March 22, 2024

VIA E-MAIL ONLY: howej1@michigan.gov

Jeremy Howe, Supervisor, Technical Programs Unit Air Quality Division Michigan Department of Environment, Great Lakes, and Energy 525 West Allegan Street Lansing, Michigan 48933

Re: SRN: U822302783, Wayne County

Dear Mr. Howe:

This letter is in response to the Violation Notice, dated February 23, 2024, received by the City of Detroit's Demolition Department ("City") regarding the demolition activities performed by the Adamo Group Inc. ("Adamo") at the former Ruddiman School property located at 7310 Southfield Road, Detroit.

The Violation Notice states that the Michigan Department of Environment, Great Lakes, and Energy ("EGLE") issued a violation notice (SRN: U822302783) on August 14, 2023 to the City for failing to remove asbestos containing waste material from the site. Subsequently, EGLE provided the City with additional time to respond in order to seek regulatory guidance from the U.S. EPA regarding ordered demolitions. Thereafter, on January 12, 2024, the City submitted a request for regulatory interpretation to the U.S. EPA regarding the City's demolition program practices and specifically the violation notice received for 7310 Southfield Road (SRN: U822302783). The U.S. EPA's response remains pending.

The Violation Notice states that on February 8, 2024, EGLE AQD observed that the site had been backfilled. The Violation Notice states that it is assumed that this was done without removal of ACWM. The Violation Notice further alleges that the removal of the ACWM was requested in the violation notice and has been delayed while awaiting the response from the U.S. EPA. The Violation Notice alleged failure to remove and deposit asbestos containing waste material at a Type II landfill prior to backfilling of the site pursuant to 40 CFR 61.150(b)(1), AQD Consent Judgment 18-862, Section 5.2.

¹ In an email dated October 27, 2023 from the EGLE Air Quality Division/Technical Programs Unit to the City of Detroit, EGLE confirmed and it was mutually understood that, "21 days once the response is received from EPA is acceptable." The response seeking regulatory guidance from the U.S. EPA remains pending.

1301 Third Street, Suite 606 Detroit, Michigan 48226 (313) 224-4737 <u>Demo-info@detroitmi.gov</u> www.detroitmi.gov/demolition

As stated above, EGLE provided the City with additional time to respond in order to seek regulatory interpretation from the U.S. EPA regarding the City's demolition program practices and specifically the demolition at 7310 Southfield Road, and the response from the U.S. EPA remains pending. However, EGLE did not allow for the additional time pending the U.S. EPA regulatory interpretation but rather reinspected the site. According to the City's licensed demolition contractor, Adamo, all ACM was removed from the site in May and June of 2023. Please see attached manifest/load tickets and notification of the ordered demolition (Exhibit A). Thereafter, the City sent Adamo to backfill the site with aggregate as a temporary measure and means to protect public health and safety with the substructure remaining open to trespass, with the backfill starting on January 12, 2024 and ending on January 31, 2024.

The City takes these allegations seriously and is committed to participating in their prompt resolution. We anticipate that EGLE will acknowledge the steps taken by the City demonstrate the necessary actions to temporarily address the alleged violations as we await the regulatory interpretation from the U.S. EPA. With the tremendous number of blighted structures being demolished within the City, all alleged violations are taken seriously to prevent any deficiencies affecting the demolition program. We appreciate your assistance and look forward to continuing our relationship with EGLE to complete this important work. Please let us know if you have any further questions with respect to this matter.

Very truly yours,

LaJuan Counts, Director

Detroit Demolition Department

cc: Mr. Jason Wolf, EGLE Enforcement Unit (wolfj2@michigan.gov)
