RE: GLWA Response to Violation Notice Dated December 11, 2017

Dear Mr. Weis:

Great Lakes Water Authority (GLWA) is in receipt of the referenced Violation Notice from the Michigan Department of Environmental Quality (MDEQ) regarding special conditions of Permit to Install (PTI) 346-08 (Connor Creek Combined Sewer Overflow Retention Treatment Basin). The Violation Notice states that records of the amount of diesel fuel used in the engine (diesel generator) are not being kept as required by the PTI. The referenced diesel generator is a 2000 kW Caterpillar Engine used for emergency power at the Connor Creek Combined Sewer Overflow (CSO) Retention Treatment Basin.

GLWA believes records were not supplied as requested due to a miscommunication. Please refer to my email dated November 13, 2017 regarding contact information for different GLWA facilities, for your convenience contact information is attached with this letter. Please be advised that fuel usage records are available and have been attached for your review. In addition to the attached fuel records, GLWA has created a tracking sheet for summarizing and calculating the 12-month rolling usage. A copy of this document has also been attached for your review.

Luther Blackburn is our primary contact for any regulatory matters concerning the CSO treatment facilities operated by GLWA. Non-compliance communication regarding these facilities should be forwarded to my attention. Should you require further information regarding our response to the violation notice, please contact me at 313-297-4301 or via email at Majid.Khan@glwater.org

Sincerely,
