Re: Cadillac Asphalt, Clarkston Plant, Permit 443-82H, SRN B4287  
Violation Notice Response

Dear Ms. Kelly:

This letter is in response to the violation notice we received dated July 7, 2016. The following is our response.

The Violation Notice stated that the CO readings completed at startup were not a complete set of 8 readings over a 30 minute period. Our plant operator misinterpreted the permit condition (1.18) and did not record a complete dataset during the startup check of the burner. We have provided additional training to the plant operator and have completed two additional sets of CO readings. Attached are the results from June 21 and July 19 demonstrating that the plant was in compliance.

Cadillac Asphalt believes that the situation has been corrected. Should you have any questions or require additional information, please feel free to contact me at 734-777-3647.

Sincerely,

Susanne Hanf  
Environmental Engineer
