 DATE OF REPORT : 9/12/16
 REASON FOR INSPECTION : Scheduled Inspection.
 INSPECTED BY : Jorge Acevedo
 PERSONNEL PRESENT :
 FACILITY PHONE NUMBER :
 FACILITY FAX NUMBER :

INSPECTION NARRATIVE:

On September 12 2016, I conducted a scheduled inspection of Wolverine Pipeline. I drove to the vicinity of the facility at 1:25PM. The facility is permitted for a storage tank, which was issued by AQD on February 3, 2006. The gates were locked and there was activity but it appeared to be occurring at the Buckeye Terminal, which is next door to the site which contains the storage tank. On August 15, 2016, I spoke to Steve Iseminger of Wolverine Pipeline. He said that the storage tank was not in use and that it ceased operation in 2013. He explained that the company was looking into revising their permit to accommodate a potential increase in throughput. I explained to Mr. that I would follow up once the permit was issued to conduct my inspection. As of September 12, 2016, no permit application has been submitted to the AQD. I will follow up as necessary when the permit application is received.
