Dear Jeff Johnston:

VIOLATION NOTICE

On August 17, 2023, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Roush Industries located at 36630 Commerce in Livonia, Michigan. The purpose of this inspection was to determine Roush Industries' compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Renewable Operating Permit (ROP) number MI-ROP-M4780-2023.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
EU-B01TCELL15 Dynamometer test cell	MI-ROP-M4780-2023 FG-B01TCell14&15 Special Condition VIII.3	Test cell 15 in building 1 has two exhaust stacks, but the test cell is only permitted to have one exhaust stack.

In the facility ROP MI-ROP-M4780-2023, flexible group FG-B01TCell14&15 includes two dynamometer test cells located in building 1: test cell 14 (EU-B01TCELL14) and test cell 15 (EU-B01TCELL15). The flexible group also includes three exhaust stacks: two stacks (SV-TCELLB01-14A and SV-TCELLB01-14B) are associated with test cell 14, and one stack (SV-TCELLB01-15) is associated with test cell 15. During the inspection, AQD staff observed that test cells 14 and 15 each exhaust out of two unobstructed and vertical stacks, when only one stack is permitted for test cell 15.
