Subject: Reply to Notice of Violation

To Whom this may concern:

This letter is in response to the referenced Air Quality Activity Inspection Report, dated December 19, 2019, signed by Monica Brothers. The report pertains to an inspection performed by EGLE on November 21, 2019.

The report identified two (2) Notices of Violation, Printing operations and cleaning tanks.

Explanation for the cause of the Violation

Lack of knowledge is our cause for this violation. The person who initiated the exemption has been replaced 3 different times in the last decade. Neither one we are aware of keeping 'emissions' records. As this is all new to us, the duration of the violation will occur until our corrective action can be completed.

Corrective Steps that have been Taken

These violations have been brought before our management team. After reading the report, it was found that our corrective action will be to, complete an PTI application. We are currently looking through our archive room as well, to see if we can find any records of previously recorded air quality records. I have requested assistance by emailing James Ostrowski as I do not know which permit to look for and to seek help to calculate emissions.

Date When Corrective Action will be Completed

Full implementation of the permit will depend on the review/approval times. I am hoping it will take 4-8 weeks.

Please Feel Free to contact me if you need anything else.
