Re: Response to Violation Notice: March 17, 2022

Dear Mr. Adam Shaffer

Below I have provided our responses to the Violation Notice.

Response to Violation Notice dated March 17, 2022

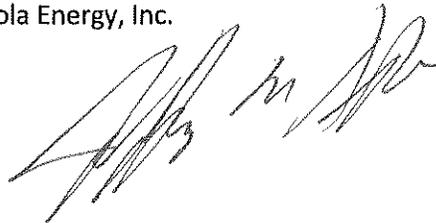

<u>Allegation</u>	<u>Response</u>
No wind shroud for flare.	We are planning on updating a few of our flares over the next couple years. Included in these plans are the flares at the Walat 6/11, Nixon Farm, and B1B2. We have contacted Wisner Machine Works to begin welding new shrouds. My goal is to have the Nixon Farm and Walat 6/11 flare shrouds replaced this year. The B1B2 is much more difficult to get to because of its height so if I can't get to it this year, it will be next year.
Oil storage tank not vented to flare.	It was under our belief that oil storage tanks for sweet wells do not need to be vented to the flare. We believe that hooking a sweet tank to a sour flare adds more places to where the sour gas might escape.

Please contact me if you have any questions.

Respectfully submitted,

Tuscola Energy, Inc.
