

May 13, 2024  
Air Quality Division, Lansing District Office  
Michigan Department of Environment, Great Lakes, and Energy  
Attention: Dan McGeen

Dear Mr. McGeen,

This is in response to the Violation Notice for Air Permit 1058-92A at Acument Global Technologies in Holly Michigan.

The two instances of noncompliance, for the diameters of stacks SV-Quench 1 and SV-Quench 2 being wider than the maximum allowed 6 inches.

In September 2018 the heat treat quench belts were installed with galvanized covers. The 6 inch stacks were disassembled and 18 inch stacks were installed.

Acument Global Technologies will be applying for a revision to an already existing air permit (1058-92A).

**Company:** Acument Global Technologies
