SUBJECT:		
RESOLVED COMPLAINTS:		

On October 23, 2013, I, Rebecca Loftus, Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of 34501 Harper Avenue in Clinton Township, Michigan. The purpose of the inspection was to determine the facility's compliance with the requirements Michigan's Air Pollution Control Rules and the Federal Clean Air Act, Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act of 1994.

Upon arrival I noted Venture Industries is no longer in business at this location. JVIS USA LLC now occupies the building. Mr. David Woy and Mr. Don Demo escorted me through the building.

JVIS USA LLC manufactures plastic parts for the automotive industry. The building has 43 injection molding machines, which appear to be exempt from obtaining a PTI pursuant to Rule 286. No painting is currently conducted at the facility as color beads are mixed into the plastic part at the machine.

The building also has small space heaters and air compressors. The space heaters appear to be exempt pursuant to Rule 282(b)(i). A natural gas back-up generator is used to power the office equipment during emergencies; Fairbanks-Morse, Model FD100-5RO Unit C-3324, 100W, Serial number 162934531. This equipment appears to be exempt from obtaining a PTI pursuant to Rule 285 (g).

Based on information gathered, at this time, JVIS USA LLC appears to be in compliance Michigan's Air Pollution Control Rules and the Federal Clean Air Act.

In 2008, Krista Reed voided PTI No. 596-87 and PTI No. 238-01 and Dennis McGeen changed the MAERS source flag to "NO". It appears the facility was not changed from syn minor/opt-out to Minor in MACES. I will update the facility category to Minor.
