SUBJECT: scheduled site inspection for active sand and gravel quarry. Site is presently also the location of a portable concrete plant, for roadwork on I-75.		
RESOLVED COMPLAINTS:		

AQD District Staff arrived onsite to conduct inspection of Crusher Plants No. 2 and 3, with the intent of confirming compliance with Permit No. 166-05. At the time of the site inspection, neither crusher was operating due to heavy rains experienced during the past week. Staff noted that the equipment ID no.s had faded, and were difficult to read and requested that they get repainted prior to Staff returning to complete inspection activities.

Staff received notification from the site that the IDs had been repainted the week of May 22, 2017. However due to scheduling issues the return visit was not conducted until June 27, 2017. sgl
