SRN: N3254, Oakland County

Dear Mr. Meinke:

VIOLATION NOTICE

On March 8, 2019, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of MAC Valves Inc located at 30569 Beck Road, Wixom, Michigan. The purpose of this inspection was to determine MAC Valves' compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) number 130-94A.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Metallic surface coating line	PTI No. 130-94A EU00001 Special Condition III(a)	MAC Valves uses 'extreme performance' coatings that exceed the permitted limit of 3.5 pounds of VOC per gallon of coating minus water.
Chlorination process to harden rubber	PTI No. 130-94A EU00002 Special Condition VIII	Exhaust stack for chlorination process had an elbow shaped stack. Thus was not emitting unobstructed vertically upwards as required by the permit condition.

The conditions of PTI number 130-94A limit the emissions of each 'extreme performance' coating to 3.5 pounds of VOC per gallon of coating.

The exhaust stack for EU00002 has an elbow shaped exhaust point and is therefore not exhausting vertically unobstructed.
