AIR QUALITY DIVISION

State of Environment, Great Lakes, and Energy
301 East Louis Glick Highway
Jackson, Mi 49201

Attention: Mike Kovalchick

This letter is an update to DAPCO Industries initial response letter sent on 12/5/2022. DAPCO Industries has hired an environmental and degreaser consultant. These specialists will help DAPCO apply for a new air permit and solve the following violations:

- 40-foot stack required for general ventilation is missing
- Vapor degreaser has no cover

Regarding the 1,000-gallon ammonia storage tank, DAPCO has decided to downsize to a 500-gallon tank to qualify for exemption based on a recommendation from the consultant. Furthermore, all quotes have been received and DAPCO is reviewing the costs and timeframe needed to complete the project.

The violation relating to the seven metal grinding machines has been resolved and the unit is working properly.

Please feel free to contact me if you have any other questions.

Michelle Byrnes,
Material Manager
