STAFF: Kurt Childs	COMPLIANCE STATUS: Compliance	SOURCE CLASS: SM OPT OUT
SUBJECT: Verify engine removal from site per VN response.		
RESOLVED COMPLAINTS:		

On October 1, 2015 I conducted an inspection of the Delta Oil Vienna Waltz CPF in order to verify that the compressor engine permitted under PTI 147-98 had been removed. This source has an outstanding Violation Notice for non-compliance with permit conditions.

At the time of the inspection I observed that the CPF compressor building was still there but the doors were open and the compressor and engine have been completely removed from the site. There did not appear to be any equipment in operation at the time of the inspection though the blow-down tank still remained.

As a result of this inspection I recommend the VN be resolved and PTI 147-98 be voided.
