Dear Mr. Pace:

VIOLATION NOTICE

On January 3, 2016, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), investigated a complaint regarding nuisance odors in the vicinity of Tower Automotive (Tower), located at 43955 Plymouth Oaks Boulevard, Plymouth, Michigan. The purpose of the investigation was to determine Tower's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the administrative rules; the conditions of Permit to Install (PTI) number 103-02B and to investigate the complaint received on January 3, 2016, regarding odors in the vicinity of Tower.

During the investigation, staff observed the following air pollution violation:

Process Description	Rule/Permit Condition Violated	Comments
Electrodeposition Coating Process (EUELECTROCOAT)	PTI 103-02B, General Condition 6 R336.1901(b)	Strong (Level 3 to 4) electrodeposition coating odors observed emitting from the facility and impacting the neighborhood downwind.

During the investigation of January 3, 2016, strong electrodeposition coating odors were detected in the residential area downwind of the facility which were traced back to Tower. In the AQD staff's professional judgment, the odors observed were of sufficient intensity and frequency so as to constitute a violation of Rule 901(b) and PTI 103-02B, General Condition 6.

Please initiate actions necessary to correct the cited violation and submit a written response to this Violation Notice by January 26, 2016 (which coincides with 21 calendar days from the date of this letter).
