Re: Response to Violation Notice: June 28, 2022 SRN: N8276

Dear Mr. Adam Shaffer

Below I have provided our responses to the Violation Notice.

## **Response to Violation Notice dated June 28, 2022**

<b><u>Allegation</u></b>	<b><u>Response</u></b>
Quarterly Gas to Oil Ratio's not completed.	During low oil prices our company was on the brink of going out of business. We sacrificed parts from lower producing wells to keep higher producing wells going. The portable meter used to calculate gas to oil ratio's was one that we sacrificed. We have since replaced the portable gas meter and have calculated new gas to oil ratios. The newer ratios show less gas per bbl of oil produced showing that our gas production would have even been lower if we had used the new current ratios.
Inadequate gas to oil ratio records	The only reason the records are inadequate is because of out to date calculated gas to oil ratios. The new ratios have been calculated.

Please contact me if you have any questions.

Respectfully submitted,

Tuscola Energy, Inc.
