

Mr. Dennis Dunlap
Environmental Quality Specialist
Air Quality Division

On August 13, 2015 we received a violation notice for Odor that was detected off site of the property, due to our waste water treatment system.

We have currently installed an odor control misting system that is constantly running in our bays with odor eliminating liquid that has made the bays have a pleasant smell... We also are not using the outside system that lets off smell at this time, so there should not be any odor. With that being said we cannot control the odor of the trucks coming down the road on 12th St. And we cannot control the odor from the trailers pulling into our facility.

Great Lakes Trailer Washout is working hard to correct any and all problems to meet the requirements. We are providing a service that is needed in this area, and also want to please the local community.

Thank you,

Lynn Zandbergen General Manager
