Re: Violation Notice of July 28, 2016  
Inspection date July 12, 2016

Dear Monica Brothers

In response to the written violation notice Quality Precast Inc. has adopted two policies to keep the company in compliance for rule R 336.1290(Rule 290) and R336.1201 (Rule 201).

1. R 336.1290 (rule 290) Quality Precast Inc. has implemented a form to be filled out at the beginning of each month to record the amount of product on hand and record any product received that month. Subtracting the gallons from the previous month and recording the gallons used for the month. This operation will be carried out by Quality Precast Inc. quality control person.
2. R 336.1201 (rule 201) Quality Precast Inc. will now fall in compliance with the monthly record keeping of VOC material usage and meet an exemption for Rule 201 Act 451.
3. Quality Precast Inc. has implemented a form to be filled out at the end of each month to record the amount of yards produced. The mixer operator will record the daily yards produced and add each production day for the month and record the monthly total on the production form.

The forms will be turned in to the office at the end of the year and be kept on file for future use if they are needed. I have attached a copy of the forms that were created to track the usage and yardage produced. Quality Precast Inc will be monitoring any new products prior to bring them to the production process for VOC and will add them to the monitoring list if needed.

Sincerely,  
Jeff Schierbeek  
President
