June 8, 2018

Joseph Scanlan
NESHAP Asbestos Inspector
Air Quality Division

Attention Joseph Scanlan:

In regards to violation notice dated May 25, 2018.

The infraction was completely our fault. As you can see by your files, we do not do a lot of demolition. Any buildings we have torn down in the past have always been inspected and cleared through Mackinac Environmental. For verification of this you can contact Ed Radicki from Mackinac Environmental at 906-643-9948.

The demo of the burnt out building lasted 2 days, May 4 and May 6, for a total of 5 hours including mobilization. The building was very small and mostly a pile of rubble. On May 4 it was raining and what was left of the building was demolished and loaded into three dumpsters. There was a small amount left over due to lack of space in the dumpsters. The rubble that was leftover was loaded on May 6, again on a very wet day.

As far as a reoccurrence, this was clearly an oversight due to our busy schedule and inexperience in demolition. Please let us know if any further response is needed.

Sincerely,

Chad Belonga
