RE: U751704424

Dennis,

I have reviewed the proposed violations stated on your letter dated June 28, 2017 and have the following solutions to them. I have also attached the MSDS sheet for the material being transferred. That material is Rumen Buffer, an inorganic animal feed supplement.

- 1.) Opacity in excess of 20%. The particular day that you visited there was a very strong southern wind in which the wind was blowing the product away from the loading site. We are and were in the process of installing a loading building to captivate any migrant dust created by the loading of trucks. The building will enclose the loading truck and any dust created will simply settle to the floor of the building. This building should be complete by August 31<sup>st</sup> 2017.
- 2.) Air Permit. We believe that we are exempt from an air permit with the addition of the load out building under R336.1284 Suffix K, R336.1285 Suffix P, T, DD (i) (ii)

Thank you for your cooperation with us on these issues. We want to be correct in our processes and understand the concerns that were brought to our attention.
